

FROM 17 JANUARY 2026  
available on [www.flying-revue.com](http://www.flying-revue.com)

The SAFE Guide to European airports is designed to assist VFR pilots in their decision making during the flight planning phase.

The complete SAFE Guide will be accessible for the first 24 hours free of charge. After that a yearly subscription will be offered for a price of 30 EUR including VAT.

### What you will find in the SAFE Guide

- Information on the differences, rules and experiences of VFR flying in Europe and in each European country separately.
- Practical recommendations concerning preparations for international VFR flights, flights in mountainous terrain, interesting itineraries, uncontrolled airports suitable for flights to European capitals and major cities and further practical information.
- List of ICAO registered airfields and airports in each European country.
- Filters allowing pilots to find airports in each country which correspond to their selected criteria.
- Photos and screenshots of most of the European ICAO registered airfields and airports with spherical videos of all the airports with concrete runways and many airfields with grass runways. The number of videos will be steadily growing.
- Basic characteristics of each ICAO and many nationally registered airfields - runway direction and length, fuel accessibility, level of landing fees, airport restaurants, cafeterias and accommodation possibilities as well as interesting sights in the vicinity of the airports.
- Contact information, links to each airport web page, direct links to airport web cameras for airports where these are available.
- As over 1,700 of the airports shown in the SAFE Guide were visited by FAI world distance flight record holder Jiri Prusa, his experience from each of the airports and airfields is included as well.
- Discussion forum and experience sharing for all interested pilots. The possibility of rating each of the airports.
- The possibility to present your own photos and videos of any of the airports or airfields shown in the SAFE Guide.

## THE SAFE GUIDE GUIDE TO SMALL AIRCRAFT FLYING IN EUROPE

# SAFE

The only airport guide based  
on personal experience
